FIRE EXTINGUISHER COVER

The medium fire extinguisher cover will save your extinguishers from both the elements and prying fingers, providing a cost-effective solution for protecting your investment and ensuring you can rely on them in an emergency.

The medium-size cover is designed to fit most 6kg and 6-litre fire extinguishers, 2kg CO2 extinguishers, and smaller units too, such as 3kg and 4kg extinguishers. The large-size cover is designed to fit most 9kg and 9-litre fire extinguishers, as well as 5kg CO2 extinguishers, it is also suitable for smaller units as it simply fits over the top – however, it is best to confirm the dimensions first.

Featuring a clear plastic window which goes down the full length of the cover, this makes inspection easier and ensures anyone can quickly identify the type of extinguisher in an emergency. This is also screen printed with 'Fire Extinguisher'.

Manufactured for Vigil Products of a flexible, durable and waterproof nylon material (most are not), the Velcro straps at the back ensure a secure fit, including when hung on a wall or stand, and allow for quick removal thanks to the handle on top.

Product	Fire Extinguisher Cover – Medium	Fire Extinguisher Cover – Large
