# JET CHROME SPRAY NOZZLE

Made from heavy-duty chrome-plated brass, this chrome jet spray hose nozzle should last a very, very long time, even for tough jobs. The single lever valve makes it easy to change between jet and spray modes, as well as turning the flow of water off.

When selecting the size, remember this relates to the internal hose diameter you intend to fit the jet spray nozzle on to. Manufactured for Vigil Products with a working pressure of 16 bar and tested to 24 bar, it's easy to fit the chrome jet spray nozzle, just push it onto the end of the hose and secure it in position using a jubilee clip (available separately).

Perfect for use with our fire hose tubing.
