VIGIL FIRE BEATER

When it comes to fighting wildfires, you will always require the classic wildfire fire beater in your collection of wildfire firefighting tools. With a sturdy 1.35m red fibreglass handle, it's corrosion and rot-resistant with a steel bracket connecting the solid rubber beater, made from the same industrial-grade rubber as conveyor belts so you know it's plenty tough enough for the countryside.

The Vigil Fire Beater is ideal for holiday parks, country walking routes, campsites, farms and other outside spaces, it's ideal for tackling a small grass fire before it escalates in size and severity. Featuring a rubber hand grip, the longer handle allows the beating operation to happen at a distance, it will smother the flames and halt the spread of the fire.

Product	Vigil Fire Beater
Product Code	VP-WFB135
Size	1210x320x30mm
