BARRIER TAPE

Barrier Tape is a simple and cost-effective way to highlight hazards and quickly cordon off an area to manage health and safety issues in the workplace. The non-adhesive tape is available in red and white or black and yellow, which are contrasting colours everyone will instantly recognise to represent a danger or hazard, and are highly visible.

Suitable for a wide-range of uses where you need to section off an area, the barrier tape is used indoors and out at events, construction sites, public areas, sports fields and warehouses.
