VIGIL TWO STOREY FIRE ESCAPE LADDER – 7.5M

Our Vigil fire escape ladder works by hooking around the window sill, and with a total length of 7.5 metres (or 24 feet, 6 inches) it is designed to facilitate a quick escape from a three-storey window. With a lightweight and tangle-free design, it is easy to escape from the second-floor bedroom window when hooked in place so you and your family can escape no matter what.

Every Vigil fire escape ladder comes fully assembled. Each tread has an anti-slip design and features stand-offs which keep it away from the wall to give you a good footing and prevent the ladder from moving as you climb down.

Our optional child safety harness allows you to securely carry a toddler of up to 27kg down the ladder facing you, keeping both your hands free to climb down safely.

Product	Vigil Two-Storey Fire Escape Ladder – 4.5m
Product Code	VP-FEL45
W x L x D	W500mm x L360mm x D170mm
Weight	12.60kg
