Trade Double & Triple Extension Ladders

Product Description

For professional & trade use. Ideal if you are looking for a top-quality ladder to use around the home or business. This professional-grade extension ladder is manufactured to the latest EN131 Professional standards and includes a stabilising bar that requires fitting before first use. These ladders are not only lightweight to carry, but made from super strong aluminium giving you a stable platform that feels safer from which to work. The ladder has thicker box section stiles than cheaper alternatives, which makes the ladder stiffer, less likely to twist and longer-lasting. It is supplied with an extended 3-year warranty so you can expect to get many years of service from our top quality ladders manufactured here in the UK. Please note that due to the recent changes in standards, the sections of this ladder no longer separate.
